

# Sustainability

## **Sustainability at the Waldhotel Kurfürst: An experience for the senses!**

Welcome to the 3-star superior Waldhotel Kurfürst in Kaisersesch, where hospitality and responsibility go hand-in-hand! Are you ready for an unforgettable stay that not only nourishes your soul, but also benefits the environment? Let's go on a journey of sustainability together!

## **Regional Delicacies – A feast for your palate!**

What could be better than savouring the treasures of our region? Our 'Regionalmarke Eifel' initiative brings together certified businesses that offer regional products with passion and care. As proud *EIFEL* hosts, we support local suppliers and guarantee you the best quality. Try our extensive breakfast buffet! Fresh eggs from the farmer next door, crispy bread rolls from the local bakery and savoury Eifel ham from the regional Eifel brand are waiting to be discovered. We also source our game from the hunting areas around Kaisersesch. Who can say no to that?

## **Energy efficiency - For a greener future!**

Did you know that we have been operating a combined heat and power plant since 2014? This means, we are focusing on sustainable and economical energy supply in our hotel. And that's not all! In 2024, a photovoltaic system was installed to further minimise our ecological footprint. We use the energy generated not only for heating and for our wellness area, but also to supply our guests with electricity. We feed surplus energy into the public network - a small contribution to a great cause!

## **Our rooms - Comfort meets environmental awareness!**

Relax in our gradually renovated rooms with environmentally friendly ceramic flooring (Blue Angel) or green vinyl, which is fully recyclable. A cistern feeds the toilet flushes with rainwater. Isn't that brilliant?

## **Your support - Together for a greener world!**

Would you like to actively contribute to sustainability? With our 'Green Rate' you can save resources and at the same time receive a 10% discount on the room rate per night - simply by foregoing room cleaning. Book at least three nights and make your reservation at least seven days in advance. Why not think about it today?

### **For the environment - Small steps, big impact!**

We have been using washable table runners and cloth napkins since the beginning of our hotel and have favoured glass or reusable plastic. Since 2016, plastic straws have been a thing of the past - we use stylish stainless steel or glass straws! We also minimise individual packaging throughout the hotel, from breakfast to the rooms. Waste separation is a matter of course for us: organic, plastic, paper and cardboard all have their place.

### **Traveling made easy - Discover the surrounding area!**

Our hotel is just 500 metres from the train station! Travel comfortably by train to Andernach, or by bus to Cochem and enjoy the beautiful countryside without a car. Fantastic hiking trails, such as, The Way of St James or the Pommerbach Valley await you right outside the door. So why not start hiking right away?

### **Certified sustainable - Your trust is important to us!**

We are proud to demonstrate our sustainable behaviour with the *Viabono Environmental Gold* classification (since 2012) and certification as an EIFEL host. Are you ready for an experience full of „*joie de vivre*“ and sustainability? Visit us at the Waldhotel Kurfürst - where your stay is not only unforgettable, but also environmentally friendly!

## The award
